

**Table 3.** Baseline levels of acute phase reactants in predicting overall and major amputations.

	<b>Overall amputations</b>	<b>Major amputations</b>
AUC <sub>WBC</sub>	0.657	0.657
AUC <sub>PNL</sub>	0.667	0.689
AUC <sub>PLT</sub>	0.633	0.661
AUC <sub>Albumin</sub> *	0.688	0.709
AUC <sub>ESR</sub>	0.694	0.715
AUC <sub>CRP</sub>	0.741	0.708

AUC: Area under curve, CRP: C-reactive protein, ESR: Erythrocyte sedimentation rate, PLT: Platelet count, PNL: Polymorphonuclear leukocyte count, WBC: White blood cell count

Levels of acute phase reactants were obtained from 386 diabetic foot ulcer episodes

Data were expressed as AUC of the corresponding receiver operating characteristic curve (ROC). \*ROC curve was generated in regard to suppressed albumin levels.
